The Intuitively Easy Way to Put Advanced MFD Functions at Your Fingertips
Add a Touch More Efficiency

For effortless touch control and easy efficiency, the MX-3640N/3140N/2640N puts advanced MFD functions at your fingertips via a 10.1-inch colour LCD touchscreen. Fast, top-quality colour copying, convenient network scanning, a handy Advanced Preview function, and more are only a few simple finger gestures away. As a next-generation workhorse, the MX-3640N/3140N/2640N supports productivity-boosting options for document management and finishing, Internet browsing, and Sharp OSA (Open Systems Architecture) while also delivering outstanding energy efficiency and reliable data protection.

Sharpdesk Mobile—Keeping Pace with the Way You Work

As document demands increasingly move from out behind the desk to wherever business takes you, Sharpdesk Mobile*—an easy-access mobile print/scan application that connects Sharp MFDs to popular mobile devices via a wireless LAN connection—can help you keep pace. Documents scanned on a Sharp MFD can be sent to a mobile device running iOS or Android™ OS to preview and save. Documents saved on a mobile device can be printed out on the MFD, sent as e-mail attachments, or used in other applications. By combining the efficiency of Sharp MFDs and the convenience of mobile devices, Sharpdesk Mobile is adapting document usage to today’s changing work styles. It’s evolutionary!

* For details, see page 9.

Choice of Screen Style

The MX-3640N/3140N/2640N offers a choice of six LCD screen colours (black, blue, warm grey, green, orange, and pink) and a universal-design screen. While the default colour is black, users can easily select their preferred background style.
Floristry is the general term used to describe production, commerce and trade in flowers. It encompasses flower care and handling, floral design or flower arranging, merchandising, and display and flower delivery. Wholesale florists sell bulk flowers and related supplies to professionals in the trade. Retail florists offer fresh flowers and related products and services to consumers. Floristry as a term can refer to the cultivation of flowers as well as their arrangement, and to the business of selling them.

Breathtaking Image Quality

Sharp’s second-generation high-grade toner and an improved imaging system combine to allow the full spectrum of colour reproduction in crisp, sharp detail. The MX-3640N/3140N/2640N delivers fast, high-resolution copying and printing to render text documents, photographs, illustrations, maps, and graphs—including fine lines and small print—with breathtaking precision and clarity. The MX-3640N/3140N/2640N is so easy to operate, superb-quality images are always just a touch away.

Auto Colour Mode

Auto recognition

Text comes out crisp and clear, and unnecessary background colour is automatically removed

Colourful Flower Arrangement

Original

Copy

Enhanced Intuitive Operation

Simple hand gestures and a 10.1-inch colour LCD touchscreen let even first-time users navigate the MX-3640N/3140N/2640N with ease. Thanks to newly added multi-touch operation, two-finger pinch and spread gestures facilitate Web browsing and make it easy to shrink and enlarge images in Advanced Preview. Equally easy one-touch commands, such as flick, drag, and tap, provide quick onscreen access to MFD functions and ultra-smooth intuitive operation.
A Range of Copy/Print Applications

Multi Shot and Booklet Making

Thanks to Multi Shot, two to eight pages of a multi-page document can be copied and up to 16 pages can be printed onto a single sheet, reducing paper use. Also with the optional Saddle Stitch Finisher, multiple sheets can be automatically centre-stapled together to make booklets.

Built-In Duplex Module and RSPF

The MX-3640N/3140N/2640N's built-in stackless duplex module can make two-sided copies and printouts, effectively reducing paper costs as well as saving filing space. Duplex copying is even more effective when the duplex module is used together with the standard-equipped 100-sheet RSPF (reversing single pass feeder), which efficiently feeds in one or two-sided originals and can also simultaneously scan paper of different sizes. With a scanning speed of 50 opm (originals per minute) for both colour and B/W documents, the MX-3640N/3140N/2640N can complete large jobs with ease and efficiency.

Automated Finishing

The MX-3640N/3140N/2640N automates time-consuming finishing tasks and makes it easy to create professional-looking booklets. The Saddle Stitch Finisher option staples documents up to 50 sheets and can fold and staple sets of documents up to 15 sheets to make completed booklets. An space-efficient Finisher option is available for jobs that require sorting and stapling. An optional Punch Module allows you to punch holes in documents for easy filing.

Extra Paper Capacity

For high-volume work, the MX-3640N/3140N/2640N can accommodate an optional stand with 500 + 2,000-sheet paper drawers for a total capacity of 6,600 sheets. When a tray runs out of paper, the Auto Tray Switching function automatically switches to another paper tray filled with the same size paper, allowing you to do extra-large volume jobs without worry.

Supports Most Office Environments

The MX-3640N/3140N/2640N works with the latest and most commonly used versions of Windows®, Windows Server®, and Mac operating systems and network protocols—including IPv6—even in mixed OS environments. You get fast, powerful network printing via the 1000Base-T Gigabit Ethernet standard.

COPYING & NETWORK PRINTING

PRODUCTIVE

Super-Efficient Colour and B/W Output

The MX-3640N/3140N/2640N delivers a fast output of 36/31/26 cpm/ppm* in B/W and in full colour. The first copy comes out in just 5.2/5.8/5.9 seconds in B/W and 6.8/7.9/8.1 seconds in full colour to save valuable time when performing multiple short-run jobs.

* A4, long-edge feeding

A Range of Copy/Print Applications

**SUPERB IMAGE QUALITY**

**Improved Imaging System**

Sharp thoroughly revamped its imaging process for the MX-3640N/3140N/2640N; now a high-performance processor, a new developer, and the second-generation high-grade toner combine to provide breathtaking image quality. The new toner expands the colour reproducibility range for a more natural rendering of clear blue skies, emerald green oceans, and other colour images. The smaller particle size of the toner and the developer allows for reduced graininess and clear reproduction of fine lines, fine text, and halftone colours.

**High-Resolution Output**

The MX-3640N/3140N/2640N delivers 600-dpi copying and razor-sharp 1,200-dpi printing—without sacrificing output speed. Digital smoothing technology enhances the print and copy resolution to the equivalent of 9,600 x 600 dpi for incredibly smooth reproduction of fine lines. Fine-grained photographs, detailed illustrations and graphs, and small text come out crisp and clear.

**Easy, High-Quality Copying**

Built to deliver automated, high-quality copying, the MX-3640N/3140N/2640N can reproduce maps with crisp, clear text and can remove unnecessary background colour from newspaper and magazine copies. Here’s how it works: **Auto Colour Mode** analyses the contents of each page to distinguish between different components, such as photos and text, and then selects the appropriate copy mode for that page. **Auto Colour Selection** automatically determines whether a page is colour or B/W and then copies that page accordingly. **Auto Exposure** automatically removes unnecessary background colour for clearer output.

**Adobe® PostScript® 3™**

The MX-3640N/3140N/2640N supports genuine Adobe PostScript 3 for better graphics handling.

---

**VERSATILE OPERATION**

**Direct Printing**

The MX-3640N/3140N/2640N can print PDF, TIFF, JPEG, and XPS*2 files without using the printer driver. There is also a USB port beneath its control panel, which comes in handy when printing data directly from USB memory devices—an indispensable function for users who are in a hurry or who want quick machine access without a PC.

*1: Direct printing may not support all PDF, TIFF, JPEG, and XPS formats.
*2: Direct XPS printing requires optional MX-PUX1.

**Heavy-Paper Handling**

The MX-3640N/3140N/2640N can handle heavy paper up to 300 g/m², further expanding the range of printing applications.

**Repeat Layout**

Upgraded from the conventional Photo Repeat function, this function can repeat an entire page layout as a single image onto a single sheet.

**Auto Zoom for Irregular-Size Originals**

With Auto Zoom, after the user specifies the required finished size of a copy, the MX-3640N/3140N/2640N will automatically calculate the appropriate ratio by which to reduce or enlarge an irregular-size original.

**Layout Print**

This function repeats an entire page layout as a single image. The user can specify whether or not to repeat the first page (cover page) of the document.

**Simultaneous Job Processing**

The MX-3640N/3140N/2640N makes it easy to simultaneously carry out multiple jobs. Scanned documents can be copied and e-mailed at the same time. Documents can be simultaneously printed and faxed for ultra-convenient multitasking.

---

**Other Key Features**

**Adobe® PostScript® 3™**

The MX-3640N/3140N/2640N supports genuine Adobe PostScript 3 for better graphics handling.

- **Tab Copy / Tab Print** can copy or print directly onto tabs on document separators and insert them into assigned positions.
- **Multi-Page Enlargement** divides an image onto separate sheets for copying/printing posters.
- **Carbon Copy Print** mode automatically outputs multiple printouts of the same data on plain and/or coloured paper; convenient for invoices and purchase orders.
- **Form Overlay** can store office document formatting such as letterheads and overlay contents in colour, eliminating the need for pre-printed paper.
- **Barcode font** compatibility (requires optional MX-PF10)
- **Card Shot** enables easy copying of both sides of a card (credit cards, ID cards, etc.) onto a single page.
- **Colour Stamp** labels your copies with page numbers, the date or text such as "Urgent" in up to four different colours.
- **Book Copy** is convenient for compiling copies of a book or bound originals into pamphlet format.
A3 Colour Network Scanning
The MX-3640N/3140N/2640N works as a full-colour network scanner and supports TIFF, PDF, PDF/A, encrypted PDF, compact PDF*, JPEG, and XPS file formats. Converting any type of paper-based document, up to A3 in size, into an editable digital file is as easy as making a copy. Enhanced scan performance improves the legibility of extremely fine text and allows vivid colour reproduction in scanned documents. Auto Colour Selection chooses the right mode for scanning originals containing both colour and B/W pages (see page 4). Five levels of sharpness and contrast control enable finely tuned adjustments for optimal image quality.

* Requires optional MX-EB11.

Multiple Distribution of Scanned Files
With just a few taps on the LCD touchscreen, you can choose different ways to distribute your scanned documents. Scan to E-mail sends documents as an e-mail attachment. Scan to FTP Server scans documents directly to an FTP server for storage. Scan to Desktop sends scanned documents directly to your PC desktop. Scan to Network Folder (SMB) sends files to a shared folder on a networked Windows PC. Scan to External Memory Device scans documents directly to USB memory devices. Scan to Fax enables conventional faxing or Internet faxing.

LDAP Support
Built-in LDAP (lightweight directory access protocol) support eliminates the need to enter or register full addresses. When you enter the first few letters of the recipient's name, the MX-3640N/3140N/2640N displays a list of possible matches from your company's LDAP server. Selected addresses can be stored to the MX-3640N/3140N/2640N's address book.

Drop Out Colour
This function removes chromatic colour from a scanned image, reducing the data size for compact storage and enhancing the legibility of B/W text to improve the text recognition rate before OCR.

Black Letter Emphasis
When text-heavy documents are scanned, this function improves the legibility of B/W text while keeping the file size down. Text is scanned at high resolution while the rest of the document, including photos and illustrations, is scanned at a lower resolution.

Improved Address Book
With the MX-3640N/3140N/2640N's improved address book format, up to seven destinations, including e-mail addresses, fax numbers, and FTP addresses, can be displayed under each registered entry. For enhanced security, when registering an entry, you can select whether the information will be open to all MFD users or limited to only designated users or groups. Since only the viewable addresses for each logged-in user are displayed, the list of addresses is narrowed down, making address searches easier.

Note: Contact a Sharp customer representative for details on activating this function.

PC-Fax/PC-Internet Fax
Directly send a document created on your PC to a recipient's fax machine via a phone line or the Internet without printing to paper. Save time and paper costs while retaining original document quality.

Internet Fax
Economically send and receive faxes to and from other T-37-compliant Internet fax machines via the Internet. Thanks to Direct SMTP support, outgoing Internet faxes do not go through your mail server, making transmission faster and cheaper.

Network Fax
Note: Requires optional MX-FWX1.

Paperless Faxing with Inbound Routing
Paperless faxing with inbound routing lets you check incoming faxes via e-mail before printing them out. It can also forward incoming faxes to destinations—another fax/Internet fax machine, an FTP server, a network folder (SMF), or a PC desktop—specified for each sender. When fax data is transferred by file, the Inbound Routing function automatically attaches the fax sender's name (as registered in the MFD's address book) to the file, so recipients will know who sent the fax.

Fax Data Storage on MFD Hard Disk
The MX-3640N/3140N/2640N automatically stores data from incoming and Internet faxes on its hard disk for easy confirmation and printing from a PC.

Note: PC-Internet Fax requires optional MX-FWX1; PC-Fax requires MX-FX11.
Document Management on the Hard Disk

You can save processed job data in designated folders on the MFD’s hard disk, making it easy to instantly recall saved documents or jobs for printing and sending at a later time. This contributes greatly to efficient sharing and distribution of information in your business operations.

Quick Filing

Up to 10,000 pages or 1,000 files*3 that have been copied, printed, scanned, or faxed can be stored by job on the hard disk in a Quick File Folder. You can easily reuse saved data without having to reload or rescan the original.

Advanced Filing Function

Up to 20,000 pages or 3,000 files*4 that have been copied, printed, scanned, or faxed*4 can be stored by job on the hard disk in up to 1,000 folders with customised names and locations. Enhanced security features require users to enter a 5 to 8-digit password to access secure folders, protecting your sensitive data. Storage options include Main Folder for workgroup sharing and Custom Folder for enhanced-security archiving.

Easily Access to Stored Files

Documents stored on the hard disk can be quickly and easily searched and accessed from the control panel’s LCD via thumbnail displays and file previews or through a Web browser.

File Combining

For more effective data utilisation, two files saved on the MFD’s hard disk can be easily combined into one file.

PDFs for PC Browsing

Processed job data can be saved as PDF files for browsing and downloading on a PC.

Sharpdesk for Total Document Management

Sharpdesk is an original Sharp application that provides integrated desktop management of documents in over 200 file formats, including scanned paper-based documents and those created with popular applications such as Word. With Sharpdesk, documents can be organised, edited, searched, and distributed with simple drag-and-drop operation. Features include thumbnail viewing, annotation tools for paper-free proofreading, optical character recognition, the ability to combine different types of files into a single document, and more.

Sharp OSA Network Scanner Tool

This client-based scan-to-desktop option is the ideal document management system for small workgroups or offices that don’t have servers. Sharp OSA Network Scanner Tool provides centralised scan/print user profiles to give everyone in the office easy one-touch scanning to their PC from any networked MFD—without complicated settings. Scanned documents can be quickly and easily printed, filed, previewed, shared, and stored to save time and improve document workflow. Sharp OSA Network Scanner Tool automatically names PDF files based on scanned-document titles and can convert scanned documents into text with the OCR engine to create searchable PDF files.

Note: Requires optional MX-AMX2.
MULTI-LAYERED SECURITY

Designed to protect your business assets and bring you peace of mind, Sharp’s security solutions employ multiple levels of security functions—both standard equipped and optional—covering a broad range of network and data security needs. The MX-3640N/3140N/2640N safeguards sensitive data with powerful, enhanced security functions that eliminate the worry of unauthorised use and guarantee greater protection for your confidential information.

Data Encryption and Overwriting
Digital copier/printers and MFDs can retain hundreds of pages of confidential information from previous jobs on their hard disks or internal memory. To safeguard such information from unauthorised access, the MX-3640N/3140N/2640N automatically encrypts/document data stored on the hard disk and in the address book. Standard-equipped security features also provide up to seven automatic/overwrites of data generated for each job, protection of administrator/file/folder passwords, and more. Note: Contact a Sharp customer representative for details on activating these security functions.

User Authentication
The MX-3640N/3140N/2640N prevents unauthorised use by requiring passwords for machine access. This safeguarded solution can register up to 1,000 users in three access levels as Administrator, User, or Guest and can designate to which function user authentication applies. The MX-3640N/3140N/2640N can, for example, be set to allow B/W copying by all users while restricting colour copying to designated users. The MX-3640N/3140N/2640N works with an external Active Directory server to extend user authentication to multiple MFDs and a greater number of users.

Encrypted PDF with Password Protection
To prevent unauthorised viewing of confidential data, the MX-3640N/3140N/2640N enables scanned PDF data to be password protected and encrypted for transmission over the network. After transmission, viewers can gain access to the encrypted PDF only after re-entering the password.

Secure Sockets Layer
SSL (secure sockets layer) enables the encryption of data communications to prevent data leakage through the network when printing via IPP, browsing secure Web pages (HTTPS), or communicating via e-mail (SMTP and POP3) or FTP (FTPS).

IPv6 and IPsec Support
The MX-3640N/3140N/2640N supports the IPv6 Internet protocol. An obligatory part of IPv6 is IPsec (IP Security), a set of protocols for securing Internet protocol (IP) communications. IPsec encrypts and authenticates traffic between specified parties, giving IPsec-compatible products an extremely high level of network security.

Scan to Me Function
Scan to Me lets a logged-in authorised user send scanned data to his/her own e-mail address simply by pressing the start button. This eliminates the need to manually enter or select the address, thereby preventing documents from being sent to the wrong address.

Data Erase
Initialising an MFD forad initialisation function will ensure that the data generated for each job is automatically erased once that job is finished. Note: Requires optional Data Security Kit. May not work for certain types of devices.

Data Initialisation
The MX-3640N/3140N/2640N’s initialisation function allows confidential information to be erased. Initialising an MFD when it’s time to replace it prevents important resources, such as customer information and intellectual property, from leaking out and provides considerable peace of mind.

Secure Network Access
The IP/MAC address filtering function provides highly secure operation by restricting access to the MFDs on your office network. Only PCs that have either their IP address or MAC (media access control) address registered are allowed to use the MFDs. Attempted access from an unknown IP or MAC address will be denied, preventing unauthorised use. The MX-3640N/3140N/2640N also supports the IEEE 802.1X standard for port-based network access control, which blocks all access from unauthorised devices.

Tracking Information Print
This function prints the MFD user’s name, the date, the MFD’s serial number, job ID, and other specifics on printouts, making it possible to track documents and prevent data theft.

Hidden Pattern Copy/Print
With this function, a watermark, such as “Confidential” or “Not for Copy,” can be embedded onto a document. If that document is copied, the watermark will appear, alerting the user not to distribute it.

Document Control Function (option)
Document Control prevents unauthorised copying, scanning, faxing, and filing of confidential documents by embedding copy prevention data onto a document. When that data is detected, any unauthorised attempts to copy will be cancelled or will result in only blank-page output. Note: Requires optional Data Security Kit. May not work for certain types of documents or paper.

Data Encryption
The data generated for each job is automatically encrypted after re-entering the password.

Confidential document
Unauthorised attempt

Results in a blank page

Example: Unauthorised copying
EASE OF USE

Web-Based System Settings
Administrators can manage every important setting—including user access and security as well as other controls and configurations—through a standard Web browser right from their desktops.

Remote Diagnosis
The MX-3640N/3140N/2640N can be monitored remotely through a Web browser, letting administrators handle tasks before they become problems. When action or maintenance is required, the E-Mail Status and Alert function notifies administrators via timely e-mail alerts.

Remote Operation
The Remote Operation function lets you display the MFD’s main control panel on your PC screen, allowing you to operate every major function directly from your desktop.* This function also enables the administrator to guide an MFD user through necessary procedures and allows remote MFD operation.

* Requires VNC application.

Network Utility Software
Sharp Remote Device Manager* (SRDM) gives administrators centralised control of their networked MFDs through a standard Web browser, making device cloning and other operations easier and more accessible.

* Contact a Sharp customer representative for details on using this function.

10.1-Inch Colour LCD Touchscreen
MFD operation has never been so intuitive, so easy. The MX-3640N/3140N/2640N’s control panel features a wide, clear, WVGA-resolution LCD touchscreen. Simple flick, drag, tap, (and more) gestures performed on the screen bring easy control of every document, function, and setting. Dual-touch pinch and spread gestures enable smooth Web browsing and effortless shrinking/enlarging of Advanced Preview images. For strain-free viewing, the MX-3640N/3140N/2640N’s user interface employs a bold scalable font in sizes that vary in line with the content on display.

Mode Tabs
Mode tabs at the top of the screen make it easy to change job modes (copy, fax, document filing, Sharp OSA, etc.).

Customisable Screen
The Home screen can be customised for individual users by programming their most frequently used functions and settings, creating shortcut keys for quick and easy access, and using logos, icons, background images, and other items prepared by the user. The Enlarge Display mode brings added readability.

Advanced Preview
The Advanced Preview function saves you time and effort by displaying scanned images on the LCD for confirmation and editing. Page layout and document finishes such as stapling can be checked before the documents are printed out. Previewed pages can be easily rotated, put in a different order, and deleted via tap-and-drag editing right on the LCD. You can even erase specific parts of a previewed page and insert blank pages.

Action Panel
The Action Panel appears on the right side of the touchscreen to guide you through operational procedures. The MFD intuits what actions to take next and the Action Panel displays shortcut keys and messages pertaining to those actions.

Other User-Friendly Features

Universal Design
- The control panel can be tilted to five different angles* for easy viewing.
  * Tilts to only two angles when an optional finisher is installed.
- Easy-grip handles allow the paper drawers to be grasped from the top as well as the bottom for easy opening and closing.

Retractable Keyboard (option)
A full-size retractable QWERTY keyboard slides out from beneath the control panel to make text input fast and easy.
Outstanding Energy Efficiency
To reduce power consumption, Sharp has applied its advanced technologies across all areas of this MFD, including the hardware, software, electrical system, and supplies. As a result, the MX-3640N/3140N/2640N boasts a low consumption rate.

- Sharp’s belt fusing system shortens the MX-3640N/3140N/2640N’s warm-up time to 18 seconds, contributing to reduced overall energy consumption.

- Based on prior usage patterns, the MX-3640N/3140N/2640N automatically determines the optimal length of time to let elapse before going into auto power shut-off mode, helping reduce overall power consumption. Shortly before auto power shut-off mode begins, a message appears on the LCD indicating that the MFD will soon shut down and giving users the option to continue operation.
  * Contact a Sharp customer representative to activate this pop-up message function.

- **Power ON/OFF Schedule** function automatically turns the MX-3640N/3140N/2640N on or off according to time schedules set by the administrator.

- Before a print*/copy command is executed from the control panel, the Eco Recommendation** function offers suggestions on environmentally friendly settings, helping users achieve even greater eco-friendly operation.
  **2: Contact a Sharp customer representative for details on activating this function.

- **Eco Scan** function saves energy by keeping the fusing system shut down during jobs that don’t require the use of the fusing system, such as Image Sending and Document Filing.

- The second-generation high-grade toner has a lower melting point than conventional toner, allowing fusing to be carried out with less energy. It also offers a significantly lower consumption rate than conventional toner.

- For further energy savings, energy-efficient **LED lamps** are employed in the scan unit in place of conventional xenon lamps. A new ASIC (application-specific integrated circuit) also helps the MX-3640N/3140N/2640N deliver excellent performance and energy efficiency.

EXPANDABILITY

Sharp OSA* (Open Systems Architecture)
Innovative Sharp OSA technology allows you to interact with critical business and network applications right from the LCD control panel, offering a new realm of control and convenience. Since Sharp OSA utilises industry-standard network protocols, the MX-3640N/3140N/2640N can easily integrate with document management systems, enterprise resource planning software, workflow applications, and more. The latest version of Sharp OSA can reach beyond the firewall, enabling deep system construction and services over the Internet. Sharp OSA brings benefits such as reducing the costs associated with system implementation and management, as well as enabling data sharing across company branch offices or subsidiaries—effectively enhancing total business efficiency.

* Requires optional MX-AMX2 and/or MX-AMX3.

Direct Internet Access
The optional **Web Browsing Expansion Kit** gives you direct access to the Internet for easy browsing of Web sites on the colour touchscreen. With such quick access to information, brochures and user manuals in PDF format as well as maps and coupons can be printed out on the spot.

Sharpdesk Mobile
Sharpdesk Mobile is a mobile print/scan application that combines the convenience of mobile devices and the efficiency of Sharp MFDs to make conducting business on the go easier than ever. Documents scanned on a Sharp MFD can be sent to a mobile device running iOS or Android OS to preview and save. Documents saved on a mobile device can be printed out on the MFD, sent as e-mail attachments, or used in other applications.

Notes on Sharpdesk Mobile:
- This application can be downloaded for free from the Apple App Store for iPad and iPhone or from Google Play™ for Android devices.
- Supported devices: iPhone 4, iPhone 4S, iPad, iPad 2, and iPad (3rd generation) running iOS 4.3, 5.0, 5.1, or 6.0, and Android-based mobile devices running Android 2.3 or 4.0 (SD memory card required for some devices; recommended screen resolution of 800 x 480 pixels or higher).
- Availability varies by country/region. For details, see the Sharpdesk Mobile support Web site:

**MX-DE12 Stand with 500-Sheet Paper Drawer**

- **Paper size**: A3W to ASR
- **Paper capacity**: 500 sheets (A4 or smaller), 250 sheets (B4 or larger)
- **Stapling capacity**: 50 sheets (A4 or smaller), 30 sheets (B4 or larger)
- **Staple position**: 3 locations (front, rear or both)

**MX-DE13 Stand with 2 x 500-Sheet Paper Drawers**

- **Paper size**: (upper and lower tray) A3 to A5R
- **Paper capacity**: (upper and lower tray) 500 sheets each

**MX-DE14 Stand with 3 x 500-Sheet Paper Drawers**

- **Paper size**: (upper/middle/lower tray) A3 to A5R
- **Paper capacity**: (upper/middle/lower tray) 500 sheets each

**MX-DE20 Stand with 500 + 2,000-Sheet Paper Drawers**

- **Paper size**: (upper tray) A3 to ASR
- **Paper capacity**: (upper tray) 500 sheets each
- **Paper capacity**: (lower right/left tray) 850 sheets
- **Paper capacity**: (lower left tray) 1,150 sheets

**MX-LT10 Long Paper Feeding Tray**

- **Paper size**: Max. 1,200 mm long
- **Paper capacity**: 1 sheet

**MX-LC11 Large-Capacity Tray**

- **Paper size**: A4, B5
- **Paper capacity**: 3,500 sheets

Note: Certain options may not be available in some areas.

Note: When using Sharpdesk, Sharp OSA Network Scanner Tool, and Sharp OSA, please ask your Sharp representative about PC system requirements.

### Document Filing

| Document filing capacity*4 | Quick file folder: 20,000 pages or 3,000 files |
| Stored jobs** | Quick file scan, fax transmission |
| Storage folders | Quick file folder, main folder, custom folder (max. 1,000 folders) |
| Confidential storage | Password protection |

### Network Printer

| Resolution | 1,200 x 1,200 dpi, 600 x 600 dpi, 9,600 (equivalent) x 600 dpi |
| Interface | USB 2.0, 10Base-T/100Base-TX/1000Base-T |
| Network protocols | TCP/IP (IPv4, IPv6, IPX/SPX (NetWare)), EtherTalk (AppleTalk) |
| Printing protocols | LPR, Raw TCP (port 9100), POP3 (e-mail printing), HTTP, Novell Printserver application with NDS and Bindery, FTP for downloading print files, EtherTalk printing, IPP |
| PDL (emulation) | Standard: PCL 6 emulation, Genuine Adobe® PostScript® 3™ Option: XPS |
| Available fonts | 80 fonts for PCL, 136 fonts for Genuine Adobe® PostScript® 3™ |

### B/W Facsimile (optional MX-FX11 required)

| Compression method | MH/MR/MMR/JBIG |
| Communication protocol | Super G3/G3 |
| Transmission time | Less than 3 seconds*11 |
| Modem speed | Transmission time from Standard (203.2 x 97.8 dpi) to Ultra Fine (406.4 x 391 dpi) |
| Record width | A3 to A5 |
| Memory | 1GB (built-in) |
| Grey scale levels | Equivalent to 256 levels |

---

1. At rated voltage, 23°C. May vary depending on operating conditions and environment.
2. HDD capacity depends on procurement and sourcing status.
3. Long-edge feeding of A4 sheets from 1st paper tray, using document glass, without Auto Colour Selection and Auto Colour mode, MFD in fully ready condition. May vary depending on operating conditions and environment.
4. Optional MX-EB11 required.
5. Colour only.
6. Resolutions higher than 600 dpi are interpolated.
7. To view XPS files on PCs not running Windows Vista, you must have the XPS Viewer application installed.
8. Availability varies by country/region.
9. Storage capacity will vary depending on the type of document and the scan settings.
10. Some features require/option(s).
11. Based on Sharp's standard chart with approx. 700 characters (A4 long-edge feeding) at standard resolution in Super G3 mode, 33,600 bps, JBIG compression.
